5620	pasima™ Padsheet Double	155×210	Natural
5812	pasima™ Padsheet Junior	90×210	Natural, White

\* Seams are visible.

## Handling Instructions

- ◎ Wash and dry before your first use for softer texture.
- ◎ Wash at least once a week. The texture improves as the product is washed.
- ◎ Machine-wash the product without folding or using a laundry net
- ◎ Use of either a fully automatic or twin-tub washing machine is recommended.
- ◎ Do not tumble-dry.
- ◎ Use of fabric softener or detergent with a softening agent is not recommended.
- ◎ Do not use chlorine bleach.
- ◎ Hang dry to quickly dry the product and sun dry for added warmth.
- ◎ The product withstands approximately 100 washes. Use the product as a duster when it expires.
- ◎ Lightly stretch the product with both hands when drying.

The cotton is "ALIVE". Each of the tiny and thin fibers plays an important role in absorbing and releasing moisture. Avoid damaging these plant fibers in order to lovingly use the product for a long time.

- ◎ Thoroughly made in Japan - from the making of the yarn and fabric to dyeing and sewing. No adhesives, formalin or fluorescent whitening agent are used.
- ◎ For detailed pricing and sizes, refer to the Price and Size Chart provided separately or visit our website.
- ◎ Quilting patterns will vary according to the products.

### Materials

#### ◎ Triple-Layered Products

Top and Bottom Fabrics: Cotton 100% (Gauze)  
Batting: Cotton 85% (Absorbent Cotton), Polyester 15%  
Dimension Change: -3% (JIS L 1096D)

#### ◎ 5-Layered Products

Top and Bottom Fabrics: Cotton 100% (Gauze)  
Outer Batting: Cotton 85% (Absorbent Cotton), Polyester 15%  
Center Batting: Cotton 60% (Absorbent Cotton), Polyester 40%  
Dimension Change: -3% (JIS L 1096D)

These products have been tested by the International Association for Research and Testing in the Field of Textile Ecology, and have passed the most rigorous category for "Items for babies and infants" in "OEKO-TEX® Standard 100". The baby-friendliness of our products has been certified by international standards.

Utility Model Registered

- \* The product shrinks approximately 5% after washing due to expansion of the batting.
- \* Due to the nature of the materials, color tones and sizes may show slight variations.
- \* The specifications are subject to change for improvement.
- \* Photos are for reference only.

# No-Nonsense Simple Bedding pasima

Most of the beddings today are made by combining various materials and chemicals. They are products of "additions". On the other hand, pasima is made with natural cotton refined by removing impurities and oil content without adding any antibacterial agents, fabric softeners, fluorescent whitening agents, adhesives or fungicides. pasima is a simple bedding without anything added that isn't necessary, and it helps your mind and body relax. We provide a relaxing sleeping environment year round that the human body requires but that you may not have been aware of throughout the year, and helps you gain good health by attaining good sleep.

Reiichiro Kakehashi, the inventor of pasima

# Safe

## ◎ Baby Safe (if babies chew on it).

pasima uses no finishing agents such as fluorescent whitening agents or fabric softeners. It is certified with "Class I", the strictest classification in OEKO-TEX® Standard 100, which is the international safety standard for textile products. pasima is comfortable to use and safe even for babies.

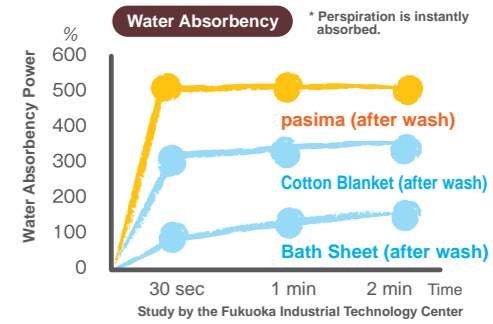

# Soft and light

## ◎ The Reason for the Comfort is the Triple-Layered Design

The batting (85% medical grade absorbent cotton, 15% polyester) is enclosed between high-density gauze sheets to make a special triple-layered structure to deliver high moisture absorbency and heat retaining property. The mattress pads (padded sheets) employ an additional batting in the center to make a thick, 5-layer structure. Pure cotton - Thin, light and comfortable to the touch. All of this helps you experience a good night's sleep.

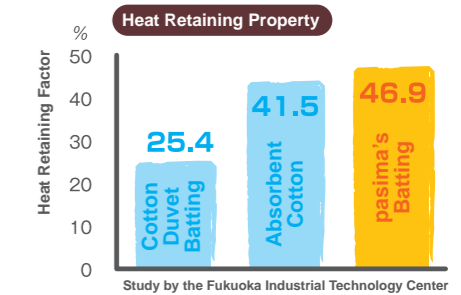

# Smooth and Dry

## ◎ pasima has 1.5 Times More Water-Absorbent power than a regular Cotton Blanket or Bath Sheet.

pasima absorbs perspiration during sleep, and evaporates it into the ambient air to keep it dry. With moderate material breathability, it remains comfortable during hot and humid summer nights.

# Cozy

## ◎ pasima's Batting has Two Times More Heat Retaining Property than Raw Cotton.

It does not only retain body heat, but emits heat by absorbing the vapor from perspiration. The special batting is warmer, lighter and more breathable than regular absorbent cotton.

pasima after wash

# Fully Washable

## ◎ Batting Becomes Puffier as it is Washed. Amazing Water Absorbent Power and Drying Property

The batting becomes puffier as it is washed and starts to show characteristic wrinkles. Its texture becomes gentler, softer and more comfortable every time it is washed. Wash the product once a week without using any fabric softeners to maintain it for a long time. Additionally, the unique structure of pasima immediately absorbs moisture. Perspiration is wicked and quickly evaporated to give you comfort all year round.

[pasima before Wash]

The batting of brand-new pasima is not puffy.

[pasima after Wash]

After being washed and dried, pasima breathes in air for comfortable puffiness.

[Regular Towel Immediately After Water is Dropped]

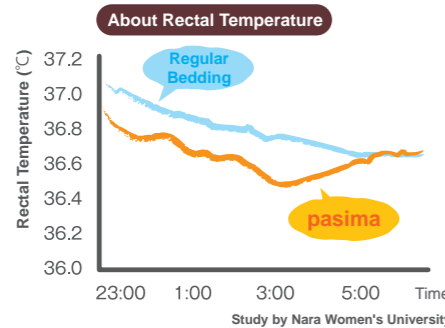

It takes a long time before a regular towel absorbs the water drop.

[pasima Immediately After Water is Dropped]

pasima immediately absorbs the water drop.

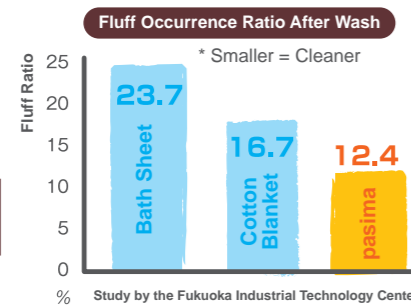

# Sleeping soundly

## ◎ The pasima sleep - Good night's sleep every night. Wake up Refreshed and Relaxed.

95% of users reported "better sleep" with pasima, according to a scientific survey by a specialist research institute. By efficiently emitting internal heat outwards, the rectal temperature decreases effectively, which is understood to contribute to better sleep.

# Peace of Mind

## ◎ Hygienic and Healthy with Low Dust

pasima uses fibers that are longer than those in regular towels. These fibers make the product light and reduce fluffing to a minimum. It is also hygienic as it is easily washable. When used by babies, it is clear that bits of fiber does not gather between their fingers.

Comfortable on Your Skin.  
Place nothing between you and pasima
